Infrastructure for quality Education

I wish to congratulate Kibabii University class of 2018 on this occasion of the third Graduation Ceremony. You have been trained to drive your own intellectual and creative capacities for the benefit of mankind.

I therefore, thank all those who have worked with you over the many years culminating in this joyous event. I have noted with appreciation the resolve by the University to develop modern infrastructure that have availed spacious lecture halls, suitable tutorial rooms, laboratories and studios as well as offices and conference facilities.

The beautiful grounds that complement well with the scenic surrounding provides a conducive environment for intellectual development and appropriate socialization of students.

I implore the University to utilize facilities in the enhancement of research activities and innovations.

It is my hope that this will continuously improve the quality of graduates from Kibabii University.
