## SECTION A (COMPULSORY)

### QUESTION ONE

Assets may result from various types of past transactions and other past events. Normally, these are purchase transactions and the events associated with production, but they may include donation (for example, by way of a government grant) or discovery (as in the case of mineral deposits). Expected future transactions or events do not give rise to assets; for example, a binding contract by an enterprise to purchase inventory does not cause the inventory in question to meet the definition of an asset of that enterprise until the purchase transaction that fulfills the contract has occurred. While expenditure is a common way to acquire or generate an asset, expenditure undertaken with a view to generating future economic benefits may fail to result in an asset, for example, if the intended economic benefits cannot be expected or are not controlled by the enterprise. Consider whether each of the following are assets, giving reasons for your answers.

1. A heap of rusty metal worth ksh.1,000,000 as scrap but costing ksh.2,000,000 to transport to the scrapdealer. (5 marks)
2. A municipal or trades union social or welfare centre outside the factory that substantially improves the overall working conditions of a firm's employees. (5 marks)
3. The benefits derived from next year's sales. (5 marks)

#### QUESTION FOUR

Human resources are considered as important assets and are different from the physical assets. Physical assets do not have feelings and emotions, whereas human assets are subjected to various types of feelings and emotions. In the same way, unlike physical assets human assets never get depreciated. Therefore, the valuations of human resources along with other assets are also required in order to find out the total cost of an organization.

Flamhoitz defines HRA as 'accounting for people as an organizational resource. It involves measuring the costs incurred by organizations to recruit, select, hire, train, and develop human assets. It also involves measuring the economic value of people to the organization'. As a Chief Accountant at the County Government of Bungoma, account for the methodology of human resources accounting that is applicable and appropriate to enable the county achieve its core mandate.
