

(Knowledge for Development)

KIBABII UNIVERSITY

UNIVERSITY EXAMINATIONS - 2021/2022 ACADEMIC YEAR

**SECOND YEAR FIRST SEMESTER
MAIN EXAMINATIONS**

FOR THE DEGREE OF BACHELOR OF SCIENCE (PHYSICS)

COURSE CODE: SPC 213

COURSE TITLE: CLASSICAL MECHANICS I.

EXAM DURATION: 2 HOURS

DATE: 25/01/2022

TIME: 8-10AM

- Answer **QUESTION ONE** (Compulsory) and any other two (2) Questions.
- Indicate **answered questions** on the front cover.
- Start every question on a new page and make sure question's number is written on each page.
- Symbols have their usual meaning.

QUESTION ONE (30 MARKS)

- a) State three functions of dimension analysis (3mks)
- b) Define space and matter (2mks)
- c) Calculate the velocity of a ball just before it strikes the ground if it is dropped from rest at a height h above the earth surface. (2mks)
- d) Discuss the branches of mechanics (3mks)
- e) Distinguish between Gravitational field and gravitational potential at a point (4mks)
- f) Define inertial frames of reference (2mks)
- g) What is a conservative force (2mks)
- h) Briefly outline Galilean transformations and show that $U' = U - V$ (4mks)
- i) Discuss the fundamental assumptions of classical mechanics (4mks)
- j) Two particles have position vectors given by $\vec{r}_1 = 2t\hat{i} - t^2\hat{j} + (3t^2 - 4t)\hat{k}$ and $\vec{r}_2 = (5t^2 - 12t + 4)\hat{i} + t^3\hat{j} - 3t\hat{k}$. Find (a) the relative velocity and (b) the relative acceleration (4mks)

QUESTION TWO(20 MARKS)

- a) What is a non conservative force (1mk)
- b) Show that the gravitational potential per unit mass at a point is given by $V(r) = \frac{-Gm}{r}$ where symbols have their usual meaning (7mks)
- c) Define (4mks)
- (i) An isopiestic process
- (ii) An isochoric process
- (iii) An isentropic process
- (iv) An adiabatic process
- d) An ideal fluid flows at 4.0 m/s in a horizontal circular pipe (4mks)
- i. If the pipe narrows to half the original radius, determine the flow speed in the narrow section (4mks)
- ii. If the fluid is water and the pressure at the narrow section is 1.8×10^5 Pa, what is the pressure at a wider section (4mks)

QUESTION THREE (20 MARKS)

- a) Differentiate between elastic and inelastic collisions (2mks)
- b) Consider a sphere rolling down an inclined plane. What would be the speed of the sphere of mass M and radius R when it reaches the bottom of an incline, if it starts from the rest at a vertical height h and rolls without slipping (7mks)
- c) Mass $M_1=70\text{kg}$ and is initially moving east at a speed $u_1=6\text{km/hr}$ while the other mass $M_2=50\text{kg}$ is moving initially north at a speed of $u_2=8\text{km/hr}$. What is the final velocity of the couple.(5mks)
- d) State the laws of thermodynamics (6mks)

QUESTION FOUR (20 MARKS)

- a) State the Newton's law of universal gravitation (2mks)
- b) Find the moment of inertia of an annular cylinder, solid cylinder and a ring (6,3,3mks)
- c) From the work energy theorem, show that the total mechanical energy of a system moving under the influence of some conservative and non conservative force is not a constant. (6mks)

QUESTION FIVE (20 MARKS)

- a) Show that if the resultant force \vec{F}_{ext} acting on the system of particles is zero, then $\frac{d\vec{P}}{dt} = 0$ (14mks)
- b) What is the rise in temperature of 5kg of water if its given 8400J of heat energy(Specific heat capacity of water=4200J/kgK (3mks)
- c) The heater of 800W is used to heat a 600g cast iron cooker plate. How long will it take to raise the temperature of the plate by 200⁰C? Specific heat capacity of iron=500J/kgK (3mks)
