- b) Choose the most suitable option from the multiple choice questions below:
(1 mark each = 10 marks)
1. A literature review is best described as:
 - a) Doing an internet search on a topic and looking through the results
 - b) A focused and critical review of literature related to the research question
 - c) A review of primary research related to your topic
 - d) A review of literature that is easily available.
 2. Why does a researcher conduct a literature review?
 - a) To familiarize themselves with the field
 - b) They are required to by other researchers
 - c) They are paid to review it
 - d) To reproduce existing research
 3. When starting a literature review, what is the first step?
 - a) Identifying the research question
 - b) Finding articles
 - c) Planning the study
 - d) Finding websites
 4. Which of the following statements is not true about the purpose of doing a literature review

- a) To learn about the existing information about the given topic
 - b) To better formulate the research question
 - c) To critically analyze the concept of being studied
 - d) To provide a summary of what has been written about the given topic
5. Which of the following approaches to reading do you think is not useful in literature review?
- a) Memorizing
 - b) Evaluating
 - c) Comparing
 - d) Arguing
6. Where do you start when conducting literature review?
- a) Scanning the source
 - b) Skimming the source
 - c) Analyzing the information
 - d) Critiquing the information
7. If you believe you will use the information from a source, what should you do?
- a) Make note of the information I think I will use
 - b) Add the information about the book to my reference list
 - c) Write my comments about the information next to my notes
 - d) All the above
8. Which of the following statements is not helpful when evaluating your literature?
- a) You only need to include the most up-to-date literature
 - b) You need to weigh up the contribution each piece of literature makes to your review
 - c) You need to determine the strengths and weaknesses of each piece of literature
 - d) You need to explore the credibility of the claims made by the authors
 - e) You need to assess the validity of the literature
9. Which of the following statements are true about the importance of literature review?
Bringing the literature together is important so that you:
- a) Are able to piece together all the literature like a jigsaw puzzle
 - b) Are able to identify if you have missed out any literature
 - c) Are able to compare the outcomes/conclusions of the different literature
 - d) Are able to compare the arguments presented in the different literature
 - e) Are able to compare the strengths and weaknesses of each piece of literature
10. Which of the following statements is not helpful? Emphasizing the purpose for your literature review when you write up is important because:
- a) It is easy to lose track of the argument you are making

- b) It is easy to go off track and find yourself discussing another aspect of the literature
- c) you need to remain close to your review question so that you lead onto your research question
- d) you need to answer your review question

QUESTION THREE (20 MARKS)
